

Custom Built Piezo Hydraulic Pumps

Product Features

- Solid-state Piezomotor® Piezoelectric Drive with Direct Electromechanical Energy Conversion
- No Electromagnetic Fields
- High Power Density / High Efficiency
- No Electric Motors or Solenoids
- Robust and Reliable Operation
- High Output Pressure and Flow Rates
- Output pressure to 2500 psi
- Flow rate to 40 cc/sec
- Aluminum Housing
- Dimensions: 1.5 x 4" L
- Weight 275 – 450 grams
- Compact Electronic Driver
- Less Space Required
- Metering capability

Piezo Hydraulic Pump with compact external drive box.

Kinetic Ceramics, Inc. 26240 Industrial Boulevard Hayward, CA 94545
